

The easiest Open Banking finance integration for JD Edwards

Bridging the gap between JD Edwards and your bank accounts

Swiftfin is an integrated banking solution leveraging the PSD2 standard. Swiftfin uses the Isabel group Ponto Connect platform for a secure and trusted PSD2 connection. Swiftfin automates your banking tasks.

Benefits and features

- ▶▶ One Click Payments
- 📺 Direct multilevel reconciliation
- 🕒 Real time bank balances and KPI's
- ⚡ 100% code free
- 🚫 No JD Edwards customizations
- 🖥️ Embedded in JD Edwards with UDO's
- 🔗 Works with Orchestrations natively
- 📺 Subscription based flexible license model

Using Isabel's Ponto Connect offering

- 🔒 Secured and licensed PSD2 API aggregator
- 🏠 Full bank coverage across Europe
- 👤 Quick & Easy set-up of bank accounts

Build on AWS technology

- ☁️ Running as secure SaaS platform
- 🔗 Security integrated with JD Edwards

Get started easily

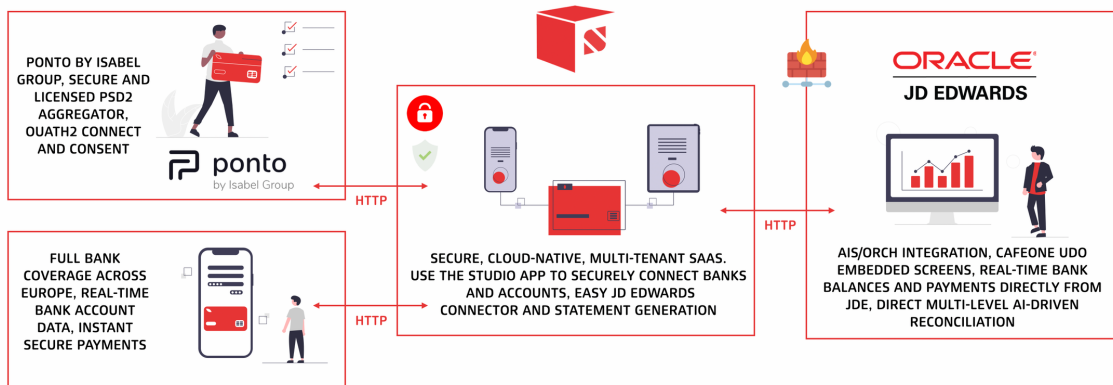

Swiftfin can be set-up in hours. Do you want to start with a demo or a call for some more background?

How it works

Swiftfin runs in the cloud and connects directly to your JD Edwards AIS Server. The SaaS platform connects over a secure connection to your JD Edwards environment, whether this runs on-premise or in the cloud.

The Swiftfin platform is configured easily to connect to your environment. Swiftfin makes it quick and easy to set-up your bank accounts. From now on, you can get rid of manual imports and exports and stop struggling with setting up the various bank statement formats.

What about security and reliability?

Swiftfin runs on the AWS platform in a secure and stable environment, connecting securely to your JD Edwards AIS server. Swiftfin uses Ponto Connect from Isabel group to connect to your bank using state-of-the-art security. Swiftfin is certified 'Well Architected' AWS application which certifies the platform works according to all high AWS application design standards.

AWS Well-Architected
