

Delivery management

Easily connect your webshop, ERP and WMS to all your carriers!

Automate every step of delivery management from options at checkout to labels for returns. nShift multicarrier parcel management software gives you full control of the last mile, helps you reduce costs and streamline processes.

55 Well-known ERP, WMS & Webshop systems

150.000 Parcels per day

400+ Carriers

Over **150** countries worldwide

The benefits

- At the checkout we ensure multiple logistics options to create better conversion.
- Our tools show all delivery and collection options clearly.
- Supports a wide range of WMS and picking solutions (via partners).
- Fast and inexpensive to integrate in your software.
- With the fully integrated shipping software all shipping methods are seamlessly linked in your ERP system.
- During order completion we arrange the entire shipping process including transport booking and label printing.
- You and your customers are given the necessary status updates.
- The shipments are fully trackable via Track & Trace.

See how businesses like yours benefit from using nShift:

nShift's powerful automation software in your processes

An overview of some of the possible functionalities.

1. In your webshop check-out

- Displays pick-up locations and open times of your transporters.
- Displays shipments rates and (local) shipment options.
- Integrates shipment options with product details (table rates).

2. In your ERP order process

- Links shipment type per customer in the customer card.
- Links various e-mail templates per customer (group) in the customer card.
- Pro forma calculation of transport rates (in & sales) during quotation process.
- Supports drop shipments.

3. In your dispatch process

- Supports export processes (paperless invoicing) and ADR shipments.
- Creates transport & export documents (CMR, CN22/23, packing notes, etc.).
- Transport bookings & label print (ZPL or graphic labels).
- Shipments consolidation & advanced crossborder consolidation.

4. In your transport management process

- Business rules: dynamic control of shipment options based on info such as address, packaging, weight, costs, etc.
- Shows shipment dashboard/exception management.
- Automatic status updates with date/time of delivery and name of recipient.
- Integration with TMS planning systems.

5. In your customer service process

- E-mail notification to (final) customers.
- Exception reporting.
- Customer-specific labels/documents printing/mailing.
- Retrieves and saves Proof of Deliveries (POD).
