

About Cadran

Cadran Consultancy is an Oracle Platinum Partner and reseller. From the start in 1998 we have been supplying and implementing Oracle JD Edwards ERP software and since 2017 Oracle NetSuite. Our specialization in Wholesale Distribution, Manufacturing, Food industry and Commodity trading ensures you that we provide in-depth support in these industries.

To help our customers to keep their ERP system operational Cadran offers a 24x7 support department, so that vital business processes remain running. Cadran has over 65 employees and as a co-founder of **Redfaire International** there are even 750 consultants ready to serve you (internationally).

At the start of 2018 our BI & Analytics business unit **Cadran Analytics** was established. As a Tableau partner Cadran Analytics supports you to take full advantage of your ERP and other data to gain valuable insights quickly.

What do we offer?

Selection process

Your ERP system is your *backbone*; an appropriate and well implemented system gives you unmistakable competitive advantage.

However, selecting an ERP system is difficult and takes a lot of time. You will make an important choice for the next 7 to 10 years! During the selection process you will discover that our sales managers support you as real consultants with a lot of knowledge about your industry. They will give you an honest advice about the options but also about the impossibilities of our software for your specific processes. You can contact our customers and we sketch a realistic and clear view of the implementation process, the knowledge that you can hire, the possibility of hosting the software, training your users, upscaling and downscaling, etc.

Implementation

Our implementation methodology consists of 4 phases: *Plan, Build, Test, and Run*. After the 'Plan' phase after a few weeks, you will be ready for the rest of the project. In terms of costs and time!

During the implementation process (Build) you can count on the in-depth knowledge of our consultants about the specific processes of your organization. They have seen many companies from your industry from the inside and are able to use their experience optimally for you.

Managed Services & Support

After go live (Run), many customers decide to daily outsource their support. Our consultants are 24x7 available so can work without any problems.
